6 X 6 Round Bale Feeder Kit Assembly Instructions

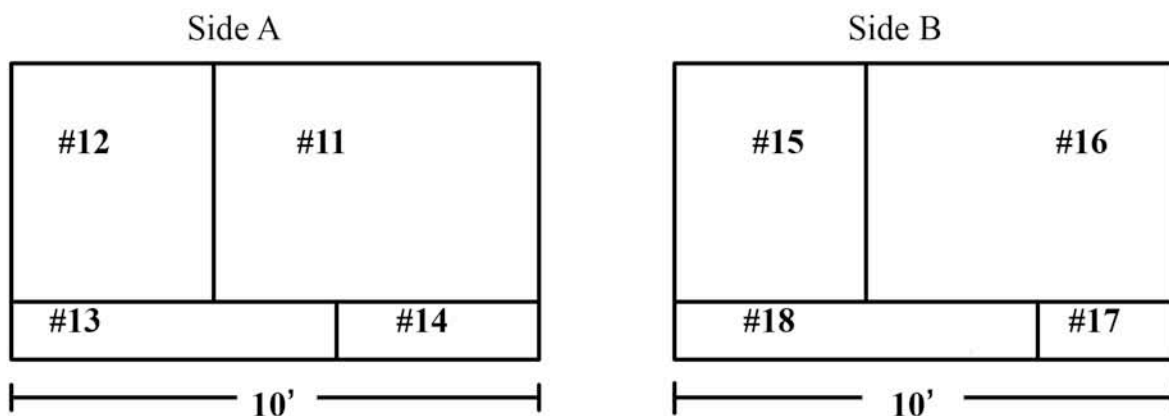

Step One: Nail gables to the frame. Lift the gable up until the bottom of the rafter is flush with the 2 x 6 rafter plate as shown in the drawing. Nail gables heavily from the inside. Put 2 pole barn nails in from the outside on the bottom part of the gable.

Step Two: Nail the rafters to the header as shown in the drawing.

Step Three: Nail the overhangs to the outside of the gable. Follow the instructions written on the back side of the overhangs.

Step Four: Put the sheathing and face board on.
Follow the numbers on the sheathing to locate them properly.

Step Five: Put the drip edge along the bottom before installing the roof metal corners & capping.
